

NUTRITIONAL AND TIME OF HARVESTING STUDIES
OF THE POPPY (Papaver somniferum L.)
ON KHASNOZEM SOILS OF TASMANIA

Nutritional and Time of Harvesting
Studies of Papaver somniferum L.

by

J.C. Laughlin B.Agr.Sc. (Melb), B.Ec. (Tas.)
Dip. Pub. Admin. (Tas.)

Submitted in partial fulfilment of
the requirements for the degree of
Master of Agricultural Science

UNIVERSITY OF TASMANIA

HOBART

DECEMBER 1977

This thesis contains no material which has been accepted for the award of any other degree or diploma in any University, and to the best of my knowledge contains no copy or paraphrase of material previously published or written by any other persons except where due reference is made in the text of the thesis.

December, 1977.

Nec non et lini segetem et Cereale papaver
tempus humo tegere et iamdudum incumbere aratris,
dum sicca tellure licet, dum nubila pendent (I 212)
Post, ubi nona suos Aurora ostenderit ortus,
inferias Orphei Lethoea papavera mittes
et nigram mactabis ovem lucumque revises. (IV 544)

Virgil-Georgics

ACKNOWLEDGEMENTS

I wish to express my thanks to my supervisor Dr. J.A. Beattie for his discussion, encouragement and constructive criticism.

A number of officers of the Tasmanian Department of Agriculture contributed to the work of this thesis. Mr. D. Munro, Plant Pathologist carried out the mycological culturing and identification work and Mr. P. Gillis, Biometrician performed a large number of the statistical analyses. Thanks are also due to colleagues in the Horticultural Division Devonport for fruitful discussion. Also to the technical staff, in particular Mr. G. Heazlewood for assistance in carrying out the field work.

Grateful acknowledgement is also made to Mr. K. Wilson and staff of the Commonwealth Department of Science, Regional Analytical Laboratory at Hobart for carrying out the morphine analyses.

SUMMARY	xiv
Section	
1. LITERATURE REVIEW	1
1.1. Introduction	1
1.2. Cultivation of <u>Papaver somniferum</u> in Australia	1
1.3. Morphology and Ecological Variation	2
1.4. Anatomy and Physiology	3
1.5. Alkaloids of <u>Papaver somniferum</u>	6
1.6. Time of Harvesting	8
1.6.1. Ontogenetic changes in plant components	8
1.6.1.1. Dry matter	8
1.6.1.2. Morphine concentration	9
1.6.2. Effect of leaching on plant morphine	10
1.6.3. Effect of capsule fungi on morphine content	11
1.6.4. Metabolic conversions of morphine	12
1.7. The Nutrition of <u>Papaver somniferum</u>	14
1.7.1. Nitrogen	14
1.7.2. Phosphorus	15
1.7.3. Effects of combined nitrogen and phosphorus	15
1.7.4. Potassium	17
1.7.5. Calcium, Magnesium and Sodium	18
1.7.6. Micronutrients	18
1.7.7. Soil pH	20
2. NUTRITIONAL STUDIES WITH BANDED NITROGEN AND PHOSPHORUS FERTILIZERS	21
2.1. Introduction	21

Section	Page
2.2. The Effect of N and Depth of Placement on the Uptake of Banded P	24
2.2.1. Materials and methods	24
2.2.2. Assessment of radioactivity	25
2.2.3. Results and discussion	25
2.3. The Effect of Banded NP Fertilizer on Dry Capsule Yield	27
2.3.1. Materials and methods	27
2.3.2. Results	28
2.3.3. Discussion	30
2.4. The Effect of NP Composition and Depth of Banding on the Yield of Mature Dry Capsules	31
2.4.1. Materials and methods	31
2.4.2. Results	33
2.4.3. Discussion	38
2.5. The Effect of Liming on Plant Yield and Nutrient Content	40
2.5.1. Materials and methods	40
2.5.2. Results	41
2.5.3. Discussion	46
2.6. Conclusions	47
3. THE EFFECT OF LEACHING ON THE MORPHINE CONTENT OF POPPY CAPSULES	49
3.1. Introduction	49
3.2. Simulated Leaching of Ground Capsules	49
3.2.1. Materials and methods	49
3.2.2. Results	50
3.2.3. Discussion	51
3.3. Simulated Leaching of Intact Capsules	51
3.3.1. Materials and methods	51
3.3.2. Results	52
3.3.3. Discussion	53
3.4. Conclusions	56

Section	Page
4. THE EFFECT OF TIME OF HARVEST ON DRY MATTER AND MORPHINE YIELD	57
4.1. Introduction	57
4.2. Changes in Capsule Morphine between Flowering and Dry Maturity	58
4.2.1. Materials and methods	58
4.2.2. Results	58
4.2.3. Discussion	60
4.3. Changes in Dry Matter and Morphine Yield between Flowering and Dry Maturity	61
4.3.1. Materials and methods	62
4.3.2. Results	67
4.3.2.1. Production of poppy heads	67
4.3.2.2. Changes in capsules	67
4.3.2.3. Changes in seed	69
4.3.2.4. Changes in stem and leaves	71
4.3.2.5. Changes in total plant	72
4.3.3. Discussion	76
4.3.3.1. Dry matter yields	76
4.3.3.2. The yield and maturity of poppy seed	78
4.3.3.3. The yield of morphine	79
4.4. Conclusions	82
5. THE EFFECT OF NP NUTRITION ON DRY MATTER YIELD AT DIFFERENT TIMES OF HARVEST	83
5.1. Introduction	83
5.2. Materials and methods	83
5.3. Results	84
5.3.1. Early growth responses	84
5.3.2. Number of capsules per plant	88
5.3.3. Fertilizer effects on capsule yield	88
5.3.3.1. Terminal capsules	89
5.3.3.2. Lateral capsules	89
5.3.3.3. Total capsules	90

Section	Page
5.3.4. Fertilizer effects on seed yield	91
5.3.4.1. Seed from terminal capsules	91
5.3.4.2. Seed from lateral capsules	92
5.3.4.3. Total seed yield	93
5.3.5. Fertilizer effects on stem and leaves	94
5.3.6. Fertilizer effects on total plant	94
5.4. Discussion	96
5.4.1. General	96
5.4.2. Capsule yield	97
5.4.3. Seed yield	98
5.4.4. Nutrient imbalance	99
5.5. Conclusions	100
6. THE EFFECT OF FUNGI ON YIELD OF MORPHINE	
6.1. Introduction	101
6.2. The Effect of Fungi on the Morphine Concentration of Ground Capsule Material	103
6.2.1. Materials and methods	103
6.2.1.1. Fungal identification	103
6.2.1.2. Fungal inoculation of ground capsules	103
6.2.2. Results	104
6.2.2.1. Identification of fungi	104
6.2.2.2. Microscopic examination of capsule wall sections	104
6.2.2.3. Morphine concentration of dry ground capsules inoculated with fungi	104
6.2.2.4. Rate of growth of fungi	106
6.2.3. Discussion	108
6.3. The Association between Fungal Colonisation and Morphine Concentration of Intact Capsules	108
6.3.1. Materials and methods	108
6.3.2. Results	109
6.3.3. Discussion	110

Section	Page
6.4. The Effect of Fungicidal Sprays and Time of Harvest on Yield Components, Morphine Production and Fungal Colonisation	110
6.4.1. Materials and methods	110
6.4.2. Identification of capsule fungi	112
6.4.3. Results	114
6.4.3.1. Fungicidal spray effects on capsules	114
6.4.3.2. Fungicidal spray effects on seed	116
6.4.3.3. Fungicidal spray effects on stem and leaves	116
6.4.3.4. Fungicidal spray effects on total plant	118
6.4.3.5. The fungal invasion of terminal capsules	119
6.4.3.6. Identification of fungal species	120
6.4.3.7. The orientation and severity of superficial fungal colonisation	122
6.4.4. Discussion	126
6.4.4.1. Spray effects on dry matter accumulation and morphine yield	126
6.4.4.2. Fungal invasion	127
6.4.5. Conclusions	130
