

Effects of Uterine Removal on the Growth of the Fetus in the Remaining Uterine Horn of Mice

Herbert Sipahutar

A thesis submitted to the Department of Zoology, University of Tasmania, in partial fulfilment of the requirements for the degree of Master of Science

May 1997

Declaration and Statement

I hereby declare that this thesis contains no material which has been accepted for the award of any degree or diploma in any university and that, to the best of my knowledge, this thesis contains no copy of previously published material except where due reference is made in the text.

Summary	I
Acknowledgments	IV
1. General Introduction	1
1.1. General Review	1
1.1.1. Reproductive Biology of the Mouse	1
1.1.2. Utero-ovarian Relationships	4
1.1.3. Progesterone and Pregnancy	9
1.1.4. Prenatal Growth	15
1.1.5. The Growth of Neonate	20
1.1.6. Normal Histology of the Ovary and Uterus	20
1.2. Study Objectives	22
2. General Methods	24
2.1. The Animals	24
2.1.1. Breeding and Handling	24
2.1.2. Mating and Judgement of Gestation	25
2.1.3. Room Environment	25
2.2. Experiment Design	26
2.3. Surgery	27
2.4. Autopsy	30
2.5. Statistical Analysis	31
3. Effects on the Length of Gestation and Prenatal Growth	
3.1. Introduction	32
3.1.1. Litter Size and Length of Gestation	32
3.1.2. Utero-ovarian Relationship and Length of Gestation	34
3.1.3. Objectives	34
3.2. Methods	35

3.2.1. Determination of Gestation length	35
3.2.2. Calculation of Gestation Length	36
3.2.3. Prenatal Growth	36
3.3. Result s	40
3.3.1. Length of Gestation	40
3.3.2. Prenatal Growth	45
3.4. Discussion	63
 4. Effects on Progesterone Concentration and Uterine and Ovarian Histology	 74
4.1. Introduction	75
4.1.1. Uterine Involvement in Progesterone Secretion by the CL	75
4.1.2. Uterine removal and progesterone levels	77
4.2. Objectives	79
4.3. Methods	79
4.3.1. Progesterone Measurement	79
4.3.2. Histological Procedure	81
4.3.3. Statistical Analysis	83
4.4. Results	83
4.4.1. Progesterone Concentrations	83
4.4.2. Histology	89
4.5. Discussion	95
4.5.1. Progesterone Concentration	95
4.5.2. Ovarian and Uterine Histology	100
 5. Effects on Postnatal Growth	 103
5.1. Introduction	103
5.1.1. Postnatal Growth	103
5.1.2. The Growth of Mammary Glands During Pregnancy	104
5.1.3. Milk Production	105
5.1.4. Maternal Behaviour	106
5.1.5. Objective	107
5.2. Methods	107
5.2.1. Maternal Behaviour	108
5.2.2. The Growth of Neonates	109
5.2.3. The Mammary Gland Weight	109
5.3. Results	110

5.3.1. Maternal Behaviour	110
5.3.2. The Growth of Neonates	113
5.3.3. The Mammary Gland Weight	116
5.4. Discussion	121
 6. General Discussion	 126
6.1. Experimental Design	126
6.2. Experimental Limitation	127
6.3. Effects on Length of Gestation, Litter Size and Progesterone Concentrations	127
6.4. Effect on Prenatal Growth	129
6.5. Effects on Postnatal Growth and Maternal Behaviour	132

Acknowledgments

I would like to express my sincere gratitude to my patient supervisor Dr. R.W. Rose, who with a combination of encouragement, criticism, guidance and assistance made this project possible and made the times of frustration more tolerable.

My special thanks also go to the academic and technical staff in the Zoology Department, University of Tasmania. In particular: Associate Professor R.W.G. White for his excellent support which made things run more smoothly, Dr. Sue Jones for instructing me in progesterone analysis (RIA) and affording interesting discussions, Dr Leon Barnuta and Dr. Roy Swain for their excellent advice and discussions on statistical analysis, Mr. Jerry Lim for his helpful advice concerning photography, Mr Barry Rumbold for his help in the purchasing of materials and Messrs Alan Dumphy and Wayne Kelly for their efficient technical support during the course of this project. Very special thanks also go to Mr William Elvey for his friendship and help in final editing of this thesis.

I am also grateful to those at the International Student Office, University of Tasmania, Hobart who gave their assistance, especially to Mr C. Street for his invaluable help at the beginning of the study, Ms J. Lansdowne for her invaluable advice during the course of study, and Ms L. Oxley and Mrs M. Eldridge for their excellent help in editing this thesis.

I wish to extend my thanks to the Directorate General Higher Education, Department of Education and Culture of the Republic of Indonesia for having awarded me a scholarship to undertake this study at the University of Tasmania. Also my thank to IKIP Medan, especially to Prof. Drs. Darmono, M Ed (Rector) and Prof Djanis Djamin, SH., M Si. (Vice Rector-I) for their assistance with the extra funds needed to finish this work.

I also thank my mother for her unfailing encouragement and support. Finally, but very significantly, I wish to give my warmest thanks to my wife, Linda, for her patience and encouragement during my two years' work in Hobart and for the sacrifice of all her weekends and for her devoted help especially during the final preparation of this thesis.
