Numbering

Where two or more figures occur on one page figures are numbered either from top to bottom or from left to right.

Class intervals of the choropleth maps

The variables have been arranged in descending arrays and the class intervals represent a fifth of each distribution.

Delimitation of the settled area

Based on an examination of the aerial photographs for the whole of Tasmania undertaken for Map 9 in the writer's Population in J.L. Davies (ed.), Atlas of Tasmania, (Hobart: Lands and Surveys Department, 1965) adjusted in the light of the Commonwealth Bureau of Census and Statistics, Population and Occupied Dwellings in Localities, Census of 1921, (unpublished); Census of 1933, 1, 597-683; Population and Occupied Dwellings in Localities with a population of from 1 to 19 persons, Census of 1933, (unpublished); Census of 1947, 1, 497-555; Population and Occupied Dwellings in Localities with a population of from 1 to 49 persons, Census of 1949, 1954, 1961, (unpublished); Census of 1954, 1961, 6, 5.

Source of the base maps and insets

Unless otherwise stated the maps are based on The Directorate of Industrial Development, Regional Planning Atlas: Economic Resources of Tasmania, (third ed., Hobart, not dated) and the insets on J.L. Davies (ed.), op. cit.
