

## Corrigendum to: Tasmania's giant eucalypts: discovery, documentation, macroecology and conservation status of the world's largest angiosperms

Brett Mifsud, Lynda D. Prior, Grant J. Williamson, Jan Corigliano, Carl Hansen, Robert Van Pelt, Steven Pearce, Thomas Greenwood and David M. J. S. Bowman

This article corrects *Australian Journal of Botany* **73**, BT23088.  
doi:[10.1071/BT23088](https://doi.org/10.1071/BT23088)

(1) On page 2, the authors wish to correct an error in Table 2:

The height for *Sequoia sempervirens* should read 116.07 m instead of 115.57 m.

(2) On page 13, the authors wish to correct an error in the sentence:

'There are 19 Tasmanian trees taller than 90 m (18 are *E. regnans*), including the tallest known live-topped tree in Australia (the 96-m 'Centurion') (Table 3, Fig. 12a), and 41 taller than 87 m (38 are *E. regnans*).'

Thus, the revised sentence reads:

'There were 18 Tasmanian trees confirmed over 90 m tall and two other trees that were in the 89.5 m to 90.2 m range yet to be measured by climber deployed tapedrop.'
